

## SaaS Hosting Benefits

- **Security compliance** (monitored Intrusion Protection System, quarterly external PEN tests, Advanced Malware Protection, URL Filtering, monitored backups, current operating system versions)
- Several easy remote access options to choose from to include VPN; Remote Access Servers; HTTPS
- All Microsoft Servers software licensing included (Windows Servers & SQL Servers)
- All document management software licensing included
- All Server hardware costs included
- **Disaster Recovery** to include Server replication & backups. (3 copies of data)
- Server support & patch management included
- Application upgrades on servers are done with no additional fees. The workstation upgrades would be addressed via local IT staff or LiveWire as preferred. (fees would apply)
- Private SaaS solution (no 3<sup>rd</sup> party hosting) via LiveWire hardware
- There are no differences in functionality between hosted and on-premise solutions. The only difference is where the servers are physically located
- Many ongoing maintenance fees for software are included and no longer paid by the firm.
- Full domain or partial application specific hosting available
- Ease of adding new technology as the firms needs change
